DETAILED ACTION

Allowable Subject Matter

1. Claims 1,3-5,7, and 8 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art Shim et al. being the closest reference, stores channel numbers based on an automatic channel scanning process, as also argued by the Applicant, whereas the instant invention discloses, channel memory device, comprising: a key input for inputting a channel number according to a user's selection; a tuner for tuning to a channel corresponding to said channel number selected by the key input from among received broadcasting signals; a controller for receiving the channel number output from the key input and storing said channel number output from the key input in the memory while controlling the tuner to tune to a broadcasting channel corresponding to the received channel number; wherein the controller receives the signal output from the signal processor, determines whether a broadcasting signal is present in the currently tuned broadcasting channel and, stores the corresponding broadcasting channel number in the memory only if a broadcasting signal is present, as in claims 1 and 5.

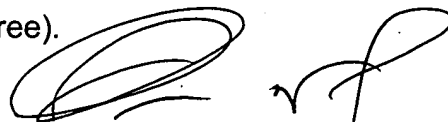

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
